

# Basalt Locking Optical Frame Display

The lockable Basalt display is our industrial, modern freestanding display. Available in either a white or black frame, this display offers capacity for 4x16 sunglasses. The satin finish, semi-transparent panel ensures limited shadowing and makes the display a popular item. The panel can rotate with a mechanism that ensures it automatically returns to the neutral position. The base is equipped with a leveling system which keeps it upright and stable even with a non-level floor.
