

DW Wooden Back panel

Our back boards bring it all together. They combine with our DW acrylic Pin panels (sold separately) and DW cabinets, along with LED lighting and optional U-bend sleeve to provide a complete display package. The back board attaches directly to the wall using Z-brackets. The DW cabinet fits nicely in front. Standard finishes are White, Black, Brushed Silver, and Walnut. Other finishes are available upon request at additional cost. Minor assembly is required.
