

# Lockable Floor-Top Optical Display DW Panel

Once again, we have expanded our DW display line to bring you our most versatile floor displays yet! Our ASIS frame now comes as two side pieces between which you can use any of our locking DW panels! The DWL.31.45/60FH/90/105 panels are nestled within the metal side frames which hold them securely along three points per side. They come with our European-made DME.TXT.15 locking rods, which are White and hold 15 frames per rod – matching up with the laser cut holes in the DW panels. The panels are available in our Clear, Frosted White, and Polar White acrylic finishes and all of our DME.TXT rod accessories can be used with them. The brushed aluminum frame coordinates perfectly with our locking rods and matches all of the other metal frames on our site – from our dispensing tables to our hanging displays to our other ASIS-style displays.
