

Open Floor-Top Optical Display DW Panel

Once again, we have expanded our DW display line to bring you our most versatile floor displays yet! Our ASIS frame now comes as two sidepieces between which you can use any of our standard DW panels! The DWL.31.45/60FH/90/105 panels are nestled within the metal side frames, which hold them securely along three points per side. The panels are available in our Clear, Frosted White, and Polar White acrylic finishes and all of our accessories can be used with them. The brushed aluminum frame works perfectly with the metal pins in the panel and matches all of the other metal frames on our site - from our dispensing tables to our hanging displays to our other ASIS-style displays.
